Document History

Version	Date of Change	Description
3.55	Aug 17, 2015	Rebranding.
3.56	Sep 16, 2015	Revised to add two new tags for Date Of Last Payment and Actual Payment Amount to the TH segment. Revised the Rules for Date Fields for the new Date Of Last Payment field. Fixed formatting issue found in the TH segment.
3.57	Sep 24, 2015	Revised to allow PIN Code from 900000 to 999999 for APO address (or State Code = 99). Added a gender type for Transgender. Added two new account types for Loan on Credit Card and Business Loan – Unsecured. Added a status flag “Restructured due to Natural Calamity” to Written-Off & Settled Status. Revised Tag 08 of the TL Segment (Date Opened/Disbursed) as Required field.
3.58	Oct 22, 2015	Removed Business Loan – Director Search from Account Type. Added a column “Use” to Appendix D – Account Type Table to include account types currently in use or for future use.
3.59	Dec 03, 2015	Addition of Accounts Types 38 - Prime Minister Jaan Dhan Yojana - Overdraft 39 - Mudra Loans – Shishu / Kishor / Tarun 50 - Business Loan – Secured Addition of text in Amount Overdue Comments. “Amount Overdue should include Principle, Interest and any other charges levied upon borrower by the Bank”
3.60	Mar 03, 2016	Addition of Accounts Types 44 - Pradhan Mantri Awas Yojana - Credit Link Subsidy Scheme MAY CLSS
3.61	Mar 14, 2016	Revised the handling of consumer name presented as a single name word.
3.62	Apr 21, 2016	Revised to include Universal ID (UID) Number as of the the required ID types.
3.63	Jun 9, 2016	Updated Min/Max PinCode for state Pondicherry in Appendix C.
3.64	Jun 28, 2017	Added Account Types 31 and 35 to Tag 12 of the TL segment.
3.65	Feb 18, 2018	Added P2P Account Types
3.66	May 12, 2018	Increased the TH Segment count to 48

3.67	May 29, 2020	Added iSPIRIT Account Type Codes
3.68	Jun 25, 2020	Added GECL Loan Account Type Codes
3.69	Mar 31, 2021	Field Tag 22 - Field Name is changed from Written-off and Settled Status to Credit Facility Status New status added 12-Restructured due to COVID-19
3.70	May 17, 2022	- Added Catalogue Value in Account Type 69 = Short Term Personal Loan [Unsecured] 70 = Priority Sector- Gold Loan [Secured] 71 = Temporary Overdraft [Unsecured] - Added Catalogue values in Credit Facility Status 13= Post Write Off Closed 14=Restructured & Closed 15=Auctioned & Settled 16=Repossessed & Settled 17=Guarantee Invoked - Added new Ownership Indicator as 5 = Deceased - Added catalogue values in Collateral Type 05 = Multiple Securities 06 = Others - Added ID type 08 = NREGA Card Number 09 = CKYC - Added Catalogue values in Payment Frequency 05 = Bullet payment 06 = Daily 07 = Half yearly 08 = Yearly 09 = On-demand - High Credit / Sanctioned Amount made mandatory - Added Catalogue value in address segment 05 = Mortgage Property Address
3.71	Aug 02, 2022	NREGA Card Number id type changed from 08 to 10 Validation rules for Credit Facility Status = 13 updated
3.72	Apr 26, 2023	High Credit / Sanctioned Amount made mandatory for record level rejection from field level rejection
3.73	Apr 07, 2025	Added a new note in Account Segment – Field Tag # 3 - Account Number – to report account number which is different from credit card number
3.74	Feb 04, 2026	All amount related field length changed to 20. “Suggested Rule” renamed as “Applicable Rule” Header Segment - - Segment tag revised from TUDF to TUDF or CONS - Reporting member/Processor Short Name– This field is optional. - Cycle Identification renamed to Reporting Cycle – Catalogue values added - Reporting password and Authentication Method renamed to Future Use Name Segment – - Comments and Applicable rules updated for all name fields.

ID Segment –

- Acceptance of any ID type for single name has been updated.
- NREGA card changed to G RAM G.
- CKYC to be reported as and when made available.
- Comments updated for ID Type and ID number

PT Segment –

- Criteria changed in case of no valid id present.

.E-mail Segment –

- Comment updated (Need to refer Appendix E)
- Appendix E has been added

Address Segment –

- Comments and Applicable rules updated
- CI needs to submit address as per the KYC document
- Pin code length changed from 10 digits to 7 digits.
- Daman & Diu and Dadra Nagar Haveli state code changed.
- Ladakh and Foreign state code added.
- Appendix B and C updated for state and pincode

Account Segment –

- Account number length updated for account type 10 and 16.
- Comments updated for “Date of last payment” and “Date closed” “Date Reported” fields.
- Refer Appendix F for description for Credit Facility Status.
- Comments & Applicable rules and Failure Outcome updated for credit Limit, Date closed and Cash Limit
- Comments & Applicable rules and Failure Outcome updated for Current Balance, Amount Overdue, Number of Days past due, Written of Amount (Principal) & (Total) and EMI Amount
- Appendix F has been added for detailed description of Credit facility status
- Appendix D updated for Account type table

TRLR Segment –

- File to be rejected if multiple TRLR available in the same file.

Note – Amendments to the UCRF shall be made by the TWG conveyor for the relevant year, provided that such revisions arise from regulatory requirements and/or are approved by TWG.

Getting Started

Please read the following information before using this guide.

Who Should Use This Guide?

This guide must be used by all the people involved in the development of the data extraction program for the member. For the purpose of this guide, we assume that the reader is familiar with basic computer programming concepts and terminologies.

Understanding the Tables in This Guide

The tables in this guide describe the segments that make up the Data Input File Format. These tables contain all the fields that can make up each segment. The column headings in these tables are consistent throughout the guide. Each of these column headings is explained in the following bullet points:

- **Position**
The starting position of a field in a fixed length segment.
 - **Field Tag**
The two-byte tag that identifies each field in a variable length segment.
 - **Field Name**
The name of each field.
 - **Field Type**
Fields are classified as one of the following:
 - **Required:** Information in these fields must be furnished. Missing or invalid information in these fields in any of the segments will cause the segment and/or entire record to be rejected.
 - **Optional:** Information in these fields is **optional** for submission for CIs. CIs are encouraged to submit this information to provide more accurate and complete response.
 - Contents in Invalid or improperly formatted fields are ignored (specifically, the values provided will not be added to the CIs database) and processing will continue.
 - **See Comments:** Special circumstances separate this type of field from the above classifications. The Comments column in the table explains the special conditions.
-

- **Character Type**

Identifies the type of character appearing in a field. The values that appear in this column are:

- **A**: Alphabetic – only letters are used.
- **N**: Numeric – only whole numbers are used, unless otherwise specified for signed numeric.
- **D**: Decimal – only one or more digits, followed by “.” (decimal point), then one or more digits as specified (e.g. 99.27).
- **A/N**: Alphanumeric – letters and numbers can be used.
- **A/N***: Alphanumeric with space – letters, number and spaces can be used.
- **P**: Printable – any printable characters can be used (specifically, ASCII [32-126], “space”, “-”, “~”).

Any unidentified / non-printable characters may lead to rejection of the field or record.

- **Length Type**

Identifies whether the field is of a fixed length or a variable length. The values that appear in this column are:

- **F**: Fixed Length – the field must be of the specified byte length.
- **V**: Variable Length – the number of bytes contained in this field is variable, but cannot exceed the maximum length of the field.

- **Maximum Length**

If the length of a field is fixed, this column shows the number of bytes that the field must contain. If a field’s length is variable, this column shows the maximum number of bytes that the field may contain.

- **Comments**

This column contains special instructions and/or specific values (highlighted in bold type) that can appear in a field. When specific values appear in this field, only those values are valid.

Overview of the Data Input File Format (Consumer)

This guide describes how to report consumer information to Credit Information Companies (CIC). The Data Input file format is made up of segments that contain specific types of information. For example:

- the Name Segment (PN) contains personal information about a consumer;
- the Identification Segment (ID) contains information about the consumer's identity. It could either be an Income Tax ID Number (PAN), a Passport number, a Voter's ID Number, a Driver's License number, a Ration Card Number, a Universal ID Number (UID), an Additional ID #1 or an Additional ID #2;
- the Telephone Segment (PT) contains the telephone numbers and types of telephone;
- the Email Contact (EC) contains the email addresses;
- the Address Segment (PA) contains the addresses;
- the Account Segment (TL) contains the account information;
- and the Account History Segment (TH) contains details of the historical account data for loading of the preceding Account (TL) segment.

The member is responsible for providing accurate and complete data consummate with this format guide in order for CICs to meet optimum system performance response times and service levels.

This format should be used to input data on all accounts in the names of individuals only, and not for those accounts that are in the names of non-individuals. All borrowings in the names of individuals, regardless of the purpose, should be included in this format. For example, a loan in the name of Mr. Amitabh Kumar for acquiring a commercial vehicle for business purposes is to be reported in this format. However, if the same loan were to be in the name of Amitabh Kumar & Sons, this loan will not be reported in this format.

All accounts in the name of non-individual/commercial entities should be reported in commercial data submission file.

The data should be sent in text format only. The following table describes the different segments that make up the Data Input File Format:

Segment Tag	Segment Name	Segment Length	Segment Type	Minimum/Maximum Number of Entries Per Record		Maximum Number of Entries Per File	Maximum Length of Segment (Bytes)
TUDF or CONS	Header	Fixed	Required	N/A	N/A	1	146
PN	Name	Variable	Required	1	1	Unlimited	174
ID	Identification	Variable	See Comments	See Comments	8	Unlimited	71
PT	Telephone	Variable	See Comments	See Comments	10	Unlimited	28
EC	Email Contact	Variable	Optional	0	10	Unlimited	81
PA	Address	Variable	Required	1	5	Unlimited	256
TL	Account	Variable	Required	1	1	Unlimited	564
TH	Account History	Variable	Optional	0	35	Unlimited	182
ES	End of Subject	Fixed	Required	1	1	Unlimited	6
TRLR	Trailer	Fixed	Required	N/A	N/A	1	4

It is important to remember that:

- Each segment in the format is made up of a certain number of fields and each field has a certain field length.
 - Only one Header Segment (HD) must appear at the beginning of each update file (a set of records from a member) and only one Trailer Segment (TRLR) must appear at the end of each update file. In case the update file consists of more than one medium, there must be one Header Segment (HD) and one Trailer Segment (TRLR) for each of the media.
 - A record refers to a set consisting of the Name, Identification, Telephone, Email Contact, Address, Account, Account History and End of Subject segments.
 - The Email Contact (EC) and Account History (TH) segments are optional.
 - The segments within a record must be sent in the following order for each borrower account: Name (PN), Identification (ID), Telephone (PT), Email Contact (EC), Address (PA), Account (TL), Account History (TH) and End of Subject (ES).
 - The Name (PN), Account (TL) and End of Subject (ES) segments must be present and valid.
 - At least one valid Address (PA) Segment must be present.
 - The Telephone (PT) Segment must be present and valid if there are no valid Identification (ID) Segments (with ID Type catalogue values provided in ID segment) for account reported in the Account (TL) Segment with date opened/disbursed on/after June 1, 2007
 - The Header (HD), End of Subject (ES), and Trailer (TRLR) segments are the only fixed-length segments. All other segments are variable in length.
 - Field Tags within each segment must appear in the order presented in this guide.
-

Formatting the Data Input File Format

Fixed-length segments contain only fixed-length fields. To format a fixed-length segment, place the data specified in each field in the correct position.

At the end of each fixed-length segment, a total byte counter indicates the required segment length. A fixed-length segment must contain the number of bytes associated with it. This means that each field in this type of segment is of a specific fixed length and not of a variable length.

Variable-length segments contain both fixed-length and variable-length fields. To format a variable-length segment:

- Supply the two-byte tag identifying the field. (Refer to the Field Tag column in tables of variable-length segments.)
- Supply a two-byte length that indicates how many bytes (or characters) are in the field value.
- Supply the field value.

For example, the name HAREN PATEL would appear as 0111HAREN PATEL in the Consumer Name Field1 of the Name Segment (PN). In this example, 01 is the Field Tag and 11 is the Field Length of the data in the field.

At the end of each variable length segment description, a counter indicates its maximum possible length. For example, the maximum length in the Name Segment (PN) can be up to 174 bytes if every field is supplied, and each data element in those fields is of the maximum length. The breakdown of the total 174 bytes is:

Field	Size
8 two-byte tags (Field Tags PN to 08)	16 bytes
8 two-byte lengths	16 bytes
Sum of all maximum field lengths	142 bytes
Total bytes in PN segment	174 bytes

Things to Remember

The following information is crucial to properly format the data and shall be observed strictly. The system will reject all fields that violate the following criteria. Remember that:

- Rejected **Required** fields cause the entire record to be rejected.
- Rejected **Optional** fields cause a default value, if any, to be assumed, or the field is ignored.
- Inaccurate data and rejected fields will cause elongated inquiry response times and could potentially generate a “no-hit” inquiry response.
- The member is responsible for providing accurate and complete data consummate with this format guide for creating a national repository of borrowers which can be helpful for developing robust credit-ecosystem. Rejected fields do not help generate accurate credit reports, so please take the time to read and use the following information:
 - Alphanumeric (A/N) and Alphabetic (A) fields of a fixed length must be left-justified. Any open positions in a fixed-field of these types must be filled with spaces.
 - Numeric (N) fields of a fixed length must be right-justified. Any open positions in a fixed-length field of this type must be filled with zeros.
 - For signed numeric fields, they may have the positive (+) or negative (-) sign at the rightmost position.
 - If a field contains the wrong type of character, it will be rejected. For example, if an alphabetic character is reported when the field requires a numeric character, the field is rejected. The converse is also true.
 - When values appear in the Comments column, note that these are the only valid values for the field. Other values will be rejected.
 - Some field tag numbers are intentionally skipped. For example, in the Name Segment (PN), Tag 06 is skipped, resulting in Tag 07 following Tag 05.
 - Monetary amount must be expressed in whole numbers (for example, 1, 51693, 309820).
 - Only one Header Segment (HD) must appear at the beginning of each update file, and only one Trailer Segment (TRLR) must appear at the end of each update file. In case the update file consists of more than one medium, there must be one Header (HD) and one Trailer Segment (TRLR) for each of the media. Segments must be sent in the following order: PN, ID, PT, EC, PA, TL, TH and then ES. Field Tags for each segment must appear in the order presented in the tables.
 - In case a borrower has more than one credit facility with the member, each credit facility must be reported as a separate record.

- Joint accounts must be reported as multiple distinct records in the file. For example, Mr. Atul E Patel & Mrs. Veena A Patel should be reported as two separate records: record 1 - MR. ATUL E PATEL and record 2 - MRS. VEENA A PATEL; both with Ownership Indicator set to 4 (Joint). This rule is also applicable to data on Authorised User or the Guarantor to a borrower where the Ownership Indicator will be set to 2 or 3, respectively.
- Duplicate Record Handling in Processing
 - Duplicate records are defined as instances where the same borrower details, including tradeline-level information, are submitted more than once—essentially identical strings provided multiple times. In processing, these duplicates will be isolated. The total input count will be reported, with a separate count of duplicates. All acceptance, rejection, and data quality metrics will be based solely on the unique eligible count (total minus duplicates).
- The input file name should conform to this format:

<REPORTING MEMBER ID> - <Date of file creation in DDMMYYYY format> - <File creation time in HHMMSS format>.txt or .gpg (encrypted) files

Rules for Date Fields

All dates must be valid calendar dates in DDMMYYYY format. For example, 09032001 is the equivalent of 9th March 2001. All date fields must contain eight digits. If the date field contains less than eight digits, the record will be rejected depending on the validation mentioned for that field. All dates must be more recent than 01011900 and earlier than or equal to current date / file processing date.

Header Segment (HD)

This Segment marks the beginning of the Data Input File Format, and:

- It is a Required segment.
- It is of a fixed size of 146 bytes.
- It occurs only once per update file.
- All the fields must be provided; otherwise, the entire data input file is rejected.

Position	Field Name	Character Type	Fixed Length	Comments
1	Segment Tag	A	04	Must contain the value TUDF or CONS.
5	Version	N	02	Must contain the value 12
7	Reporting Member / Processor User ID	P	30	Must contain the Reporting Member/Processor User ID assigned by any CIC to the member or the member's data processor.
37	Reporting Member / Processor Short Name	A/N*	16	This field is optional. The unused bytes in this field must be filled with spaces.
53	Reporting Cycle	A/N	02	CIs may choose to report the values, where applicable. In the absence of suitable identifiers, CICs will report compliance information to the RBI on the Daksh portal on a best-effort basis. Any discrepancies or errors identified by the CI or the RBI will be taken up by the respective CIC for remediation. However, in the absence of such flags or feedback, there remains a risk of inadvertent or erroneous reporting. Values are as below: DL – Daily Incremental submission W1 – 1st weekly incremental submission as on 9th of every month W2 – 2nd weekly incremental submission as on 16th of every month W3 – 3rd weekly incremental submission as on 23rd of every month ME – Month End DC-Data correction/Dispute AH – Any other Adhoc Submissions RR – Data Rejection Resubmission This field is optional. The unused bytes in this field must be filled with spaces.

55	Date Reported and Certified	N	08	This is the date AS OF which the data is reported to CIC. This is not the date the data input file was created or the date of extraction. For example, ABC Bank reports data as of 31 March 2004; extracts the file on 5 April 2004 and submits the file to CIC on 12 April 2004. In this case, the Date Reported and Certified will be 31032004. If any CI identifies any error in reporting (after identifying on its own or after brought to its attention by CIC or borrower) then the CI can correct the data. In such case, the date on which the original record was submitted has to be mentioned here. If a record reported in Mar-22 has to be corrected in Mar-26 then this field will contain the date as 31032022. The latest possible value for the date reported is current date. This date would be considered for all the regulatory reports. Please refer to the Rules for Date Fields for more information.
63	Future use	P	30	Reserved for future use. The unused bytes in this field must be filled with spaces. If any value is passed in this field, then it will be ignored by CICs. However, if the value provided contains junk characters or any non-printable characters it would lead to file being rejected.
93	Future use	A	01	Reserved for future use. The unused bytes in this field must be filled with spaces. If any value is passed in this field, then it will be ignored by CICs. However, if the value provided contains junk characters or any non-printable characters it would lead to file being rejected.
94	Future Use	P	05	Must be filled with zeros. (Reserved for future use) or the unused bytes in this field must be filled with spaces.
99	Member Data	P	48	Can be used by the member or the member's data processor to record additional information. This information is not used by the system; it is for member reference only. The unused bytes in this field must be filled with spaces.
Total bytes:			146	

Name Segment (PN)

The PN Segment describes personal consumer information, and:

- It is a Required segment.
- It is variable in length and can be of a maximum size of 174 bytes.
- It occurs only once per record.
- Tag 06 is reserved for future use.

Field Tag	Field Name	Field Type	Character Type	Length Type	Maximum Length	Comments	Applicable Rule	Failure Outcome
PN	Segment Tag	Required	A/N	F	03	Must contain the value N01 .		
01	Consumer Name Field1	Required See Comments	P	V	26	Consumer name is Required. Use as many Consumer Name fields as necessary to provide the complete consumer name.	Only one word and no initials within Consumer Name Field1 to Field5 and Any ID or Mobile Number not present.	Reject Record.
02	Consumer Name Field2	See Comments	P	V	26	The Consumer Name fields must contain the full name of the borrower and must have at least one word (but not just one initial).		
03	Consumer Name Field3	See Comments	P	V	26			
04	Consumer Name Field4	See Comments	P	V	26			
05	Consumer Name Field5	See Comments	P	V	26	Single name to be accepted if either Any ID or Mobile Number is provided. Members are encouraged to capture and provide full, expanded names instead of initials. A minimum 1 token with at least 2 alphabet are mandatory in name field. When a name word will not fit in its entirety in one consumer name field, put that word in the next available consumer name field without truncating the name. For example, do not put “PAT” in Consumer Name Field1 and “EL” in Consumer Name Field2 to complete the word PATEL.		

					Wherever names are provided across different name fields, CICs shall put a space while displaying the names. Name fields can include relationship descriptors. Son of (S/O), Wife of (W/O), Husband of (H/O), or Daughter of (D/O) are the only permissible descriptors. Any other relationship formats (e.g., C/O AMIT) are not permitted. Consumer names containing S/O,D/O, H/O or W/O will be accepted only if there is a name token reported prior to relationship identifier. Names that begin with S/O,D/O,H/O or W/O will be rejected. Both forward slashes(/) and backslashes (\) are permitted. Salutations appearing after the name will be treated as part of the name. For example, 'Rakesh Mr.' will be interpreted as a two-token name and accepted. However, if a salutation appears before the name, single-name validation rules will apply. For instance, in 'Mr. Rakesh', the salutation (Mr.) will be ignored, and 'Rakesh' will be treated as a single name, requiring one valid ID. Numbers are strictly prohibited within name strings. Disallowed Characters, as specified in Appendix A, Numbers, and Commercial Names should not be entered in any of these fields. This will lead to a rejection of the record. Please refer to the list of Allowed and Disallowed Characters in Consumer Name Field1 to Field5 in Appendix A.		
--	--	--	--	--	---	--	--

						The onus of submitting accurate data remains solely with the CI		
07	Date of Birth	See Comments	N	F	08	For all accounts which are opened/disbursed on/after May 1, 2005, this is a Required field. For all other accounts, it is Required when the field is present in the member's internal system. Please refer to the Rules for Date Fields for more information. Must be on or earlier than the date in the Date Reported and Certified field in the Header Segment (TUDF/CONS). Must be on or earlier than the date in the Date of Last Payment field (Field Tag 09) of the Account Segment (TL). Must be on or earlier than the date in the Date Closed field (Field Tag 10) of the Account Segment (TL). Must be on or earlier than the date in the Date Reported and Certified field (Field Tag 11) of the Account Segment (TL).	If this is not a Required field. If this is a Required field and do not meet the Rules for Date Fields. fields	Reject Field. Reject Record. Configurable to Reject Record.
08	Gender	See Comments	N	F	01	For all accounts which are opened/disbursed on/after May 1, 2005, this is a Required field. For all other accounts, it is Required when the field is present in the member's internal system. Valid values are: 1 = Female 2 = Male 3 = Transgender	If this is not a Required field If this is a Required field and is not provided,	Reject Field. Reject Record
Sum of all maximum byte lengths:					142			

Sum of all two-byte tags and two-byte lengths:	32	
Maximum byte size of segment:	174	

Identification Segment (ID)

The ID Segment contains identification information of the consumer, and:

- This is a Optional segment for accounts opened prior June 1, 2007.
- It is variable in length and can be of a maximum size of 71 bytes.
- For accounts opened on/after June 1, 2007, this is a Required segment if valid Telephone Segment (PT) is not provided. If this segment is not provided (with ID Type of **01 - PAN**, **02 – Passport Number**, **03 – Voter ID Number**, **04 – Driver's License Number**, **05 – Ration Card Number**, **06 - UID**, **09 - CKYC** or **10 – G RAM G**) and a valid Telephone Segment (PT) is not provided, the record is rejected.
- This can occur maximum of 8 times per record.
- The ID Type(s) should be unique within the same record.
- If two or more different ID numbers are provided against the same ID type(s) within the same consumer record, all such IDs shall be rejected.
- Any extra ID segments after the 10th one will be rejected.
- CKYC is required when the field is present in the CI's internal system. (Non Submission of CKYC will not lead to record reject)

Field Tag	Field Name	Field Type	Character Type	Length Type	Maximum Length	Comments	Applicable Rule	Failure Outcome
ID	Segment Tag	Required	A	F	03	Must contain any one value (I01 to I08) If multiple ID segments are to be provided the segments should contains I01, I02 and so on up to I08 .		
01	ID Type	Conditional Mandatory	N	F	02	Indicates the type of ID. Possible values are: 01 = Income Tax ID Number (PAN) 02 = Passport Number 03 = Voter ID Number 04 = Driver's License Number 05 = Ration Card Number 06 = Universal ID Number (UID) 07 = Additional ID #1 (For Future Use) 08 = Additional ID #2 (For Future Use) 09 = CKYC 10 = G RAM G	For all other invalid values. If the value is 07 and 08	Reject Segment. Reject Segment

02	ID Number	See Comments	P	V	30	For ID Type 01, Income Tax ID Number Is Required when the field is present in the member's internal system. Permanent Account Number (PAN) as defined by the Income Tax department. For example, ABCPD1234E If present, must be a minimum of 10 characters (excluding delimiters such as space, hyphen, etc.). The first five characters must be letters, followed by four numbers, and followed by a letter. The fourth letter must be either P, or H; otherwise, the PAN will be ignored. For ID Type 02, Passport Number Is Required when the field is present in the member's internal system. As defined by the India Security Press. For example, A-9388067 If present, must be a minimum of 7 and a maximum of 10 characters (excluding delimiters such as space, hyphen, etc.). The first or second alphabet should be a letter, and the remaining characters must be numbers. For ID Type 03, Voter ID Number is Required when the field is present in the member's internal system. Elector's Photo Identity Card (EPIC) number, as issued by the Election Commission. If present, must be a minimum of 9 characters (excluding delimiters such as space, hyphen, special characters etc.). Old format:		
----	-----------	-----------------	---	---	----	--	--	--

					For example, MT/08/039/0060725 New format: For example, AAA/999999/0 At least the first two, and no more than the first three characters must be letters, and the remaining must be alpha numeric. For ID Type 06, Universal ID Number, if provided it must contain 12 numeric characters (excluding delimiters such as space, hyphen etc.) Note that the 12th numeric character is a check digit of the previous 11 numeric characters and if that is invalid then the ID will be rejected. For ID Type 10, G RAM G is required when the field is present in the member's internal system. If present must be in below format State Code (2 digit – Alpha) District Code (2 Digit – Numeric) Block Code (3 Digit – Numeric) Gram Panchayat Code (3 Digit – Numeric) Village (3 Digit – Numeric) Household Number (3 Digit+Surname) – AlphaNumeric) For eg: MH-12-123-123-123/123Patil For ID Type 09, CKYC is required when the field is present in the member's internal system. If present, it must be up to 15 alphanumeric digit. For all other ID Types Is Required when the field is present in the member's internal system for this ID Type. No validation will be performed.		
--	--	--	--	--	--	--	--

						Non-Submission of CKYC will not lead to record reject.		
03	Issue Date	Optional	N	F	08	The following rule applies for this field: Must be on or earlier than the date in the Date Reported and Certified field in the Header Segment (TUDF/CONS). Must be later than the date in the Date of Birth field (Field Tag 07) of the Name Segment (PN). Must be earlier than the date in the Expiration Date field (Field Tag 04) of the Identification Segment (ID).		Reject Field.
04	Expiration Date	Optional	N	F	08	The following rule applies for this field: Must be later than the date in the Date of Birth field (Field Tag 07) of the Name Segment (PN). Must be later than the date in the Issue Date field (Field Tag 03)		Reject Field.
Sum of all maximum byte lengths:					51			
Sum of all two-byte tags and two-byte lengths:					20			
Maximum byte size of segment:					71			

Telephone Segment (PT)

The PT Segment contains the known phone numbers of the consumer, and:

- This segment is required if at least one Valid ID from the catalog values in the 'ID type' field is not present. It is variable in length and can be of a maximum size of 28 bytes.
- This can occur maximum of 10 times per record.
- For accounts opened on/after June 1, 2007, at least one valid Telephone (PT) segment or at least one valid Identification (ID) segment (with ID Type of **01 - PAN**, **02 - Passport Number**, **03 - Voter ID Number**, **04 - Driver's License Number**, **05 - Ration Card Number**, **06 - UID**, **09 - CKYC** or **10 - G RAM G**) is required. If not provided, the record is rejected.

Field Tag	Field Name	Field Type	Character Type	Length Type	Maximum Length	Comments	Applicable Rule	Failure Outcome
PT	Segment Tag	Required	N	F	03	Must contain the value T01 . If multiple PT segments are to be provided, the first segment contains T01 , the second contains T02 and so on up to T10 .		
01	Telephone Number	Conditional Mandatory	P	V	20	Is Required when the field is present in the member's internal system. If present, must be a minimum of five digits. Telephone numbers must not start with "1". Any Indian mobile telephone number, after stripping ISD prefix, will start with "5", "6", "7", "8" or "9" and require a minimum of 10 digits. Any new series introduced periodically should be developed by the CICs and included for data acceptance. An International Standard Dialing (ISD) number requires a minimum of nine	No valid telephone numbers provided.	Reject Segment

						digits. If more than one telephone number is entered when Telephone Type is 00, they must be separated by delimiters such as backward slash (\), forward slash (/), comma (,), colon (:), semicolon (;) or ampersand (&) sign. 3. The last no. "012 3" is clearly a truncated no. and this would be edited out from the input.). Only the edited Telephone number would be used for further field validation. The telephone number identified in this field with straight descending/ascending sequence (e.g., 876543/234567) or same digits (e.g., 222222) will be edited out from the input field. Also when multiple telephone numbers are provided, a truncated telephone number at the end of the field would be edited out as well (e.g., 5436734,645231,012 3. The last no. "012 3" is clearly a truncated no. and this would be edited out from the input.). Only the edited Telephone number would be used for further field validation.		
02	Telephone Extension	Optional	A/N	V	10			
03	Telephone Type	See Comments	P	F	02	Valid types are: 00 = Not Classified 01 = Mobile Phone 02 = Home Phone 03 = Office Phone		
Sum of all maximum byte lengths:					35			
Sum of all two-byte tags and two-byte lengths:					16			

Maximum byte size of segment: 51

Email Contact Segment (EC)

The EC Segment contains the email address of the consumer, and:

- This is an Optional segment.
- It is variable in length and can be of a maximum size of 81 bytes.
- This can occur maximum of 10 times per record.

Field Tag	Field Name	Field Type	Character Type	Length Type	Maximum Length	Comments	Applicable Rule	Failure Outcome
EC	Segment Tag	Required	A	F	03	Must contain the value C01 . If multiple EC segments are to be provided, the first segment contains C01 , the second contains C02 and so on up to C10 .		
01	E-Mail ID	Optional	P	V	70	Please refer to rules in the Appendix E.		Reject Segment.
Sum of all maximum byte lengths:					73			
Sum of all two-byte tags and two-byte lengths:					8			
Maximum byte size of segment:					81			

Address Segment (PA)

The PA Segment contains the known address of the consumer, and:

- It is a Required segment.
- It is variable in length and can be of a maximum size of 259 bytes.
- This can occur maximum of 5 times per record.
- Any extra PA Segments after the 5th one will be rejected.
- At least one valid PA Segment is required. All invalid PA Segments will be rejected.
- It can be provided as free format in Address Line Fields 1-5.
- Foreign Address is allowed to be reported for Account type (Credit Card , Loan on Card , Education Loans and Home Loans)

Field Tag	Field Name	Field Type	Character Type	Length Type	Maximum Length	Comments	Applicable Rule	Failure Outcome
PA	Segment Tag	Required	A/N	F	03	Must contain the value A01 . If multiple PA segments are to be provided, the first segment contains A01 , the second contains A02 and so on up to A05 .	For combined address line 01 to 05 must be length of 3	Reject Segment. (Reason: Invalid address)
01	Address Line1	Required	P	V	40	It must be a complete address, which may includes within Address Line1 to Address Line5, the following: Location, City/Town, and/or District, State, and PIN Code must be consistent to the KYC documentation submitted to CI. The onus of submitting accurate data remains solely with the CI. Do not split words between two fields. For example, do not put "FLA" in Address Line1 and "T" in Address Line2 to complete the word FLAT. When a word will not fit in its entirety in one address line field, put that word in the next available address line field. Do not truncate addresses.		
02	Address Line2	See Comments	P	V	40			
03	Address Line3	See Comments	P	V	40			
04	Address Line4	See Comments	P	V	40			
05	Address Line5	See Comments	P	V	40			

06	State Code	See Comments	N	F	02	For all accounts that are opened on/after June 1, 2006, this is a Required field. For all other accounts, it is Required when the field is present in the member's internal system. For APO address, if this field is a Required field, then the State Code must be provided. If the State Code is not known, then it should be set to 99. If State or Union Territory is known then enter the two-digit code for the State/Union Territory. Please refer to the list of State/Union Territory Codes in Appendix B. For Foreign Addresses, state code 77 to be used.	If this is a Required field and an invalid State Code is Provided. If this is not a Required field and an invalid State Code is provided. If PIN Code is entered, the first two digits do not match the State Code as defined in Appendix C.	Reject Segment. Reject Field. Reject Segment.
07	PIN Code	See Comments	P	V	7	For all accounts which are opened/disbursed on/after June 1, 2006, this is a Required field. If present, all characters other than the digits 0-9 shall be stripped out. The remaining value must be exactly 6 digits long, and the last three digits must not be all zeroes ("000"). However, for APO address, if this field is a Required field, then the PIN Code must be provided. If the PIN Code is not known, then it should be set to the value starting from 900000 till 999999. For example, all of the following are valid PIN codes: "604002", "604002", "604-002", "900000", "900 000". The following are NOT valid PIN codes: "604", , "6040020000", "0000604002",.	If this is a Required field and an invalid PIN Code is provided. If this is not a Required field and an invalid PIN Code is provided.	Reject Segment. Reject Field.

						Please refer to Appendix C for additional information on PIN Code validation. For Foreign Address i.e. state code 77, Pin code won't be validated. Pin code will be accepted as it is as long it conforms to the length/character validations		
08	Address Category	See Comments	N	F	02	Valid values are: 01 = Permanent Address 02 = Residence Address 03 = Office Address 04 = Not Categorized 05 = Mortgage Property Address Address Category will be defaulted to 04 when this tag is not provided or when the value is missing or invalid.		
09	Residence Code		N	F	02	Valid values are: 01 = Owned 02 = Rented Invalid value will be ignored.		Reject Field.
Sum of all maximum byte lengths:					216			
Sum of all two-byte tags and two-byte lengths:					40			
Maximum byte size of segment:					256			

Account Segment (TL)

The TL Segment contains the credit information of the consumer, and:

- It is a Required segment.
- It is variable in length and can be of a maximum size of 433 bytes.
- It occurs only once per record.
- Tags 06, 07, 23-25, and 27-33 are reserved for future use.
- If a suppressed account is submitted by the Credit Institution in the UCRF format, the CIC will accept and update the information; however, the updated details will be available for rendering only after the account is unsuppressed.

Field Tag	Field Name	Field Type	Character Type	Length Type	Maximum Length	Comments	Applicable Rule	Failure Outcome
TL	Segment Tag	Required	A/N	F	04	Must contain the value T001 .		
01	Current/New Reporting Member Code	Required	A/N	F	10	Must contain the Reporting Member Code of the member who reported the account and should match with the Reporting Member / Processor User ID provided in the Header segment. If a Reporting Member Code changed and the new Reporting Member Code is being reported for the first time, complete this field with the new Reporting Member Code. Provide the Old Reporting Member Code in the Old Reporting Member Code field (Field Tag 16).		Reject Record.

02	Current/New Member Short Name	Optional	A/N*	V	16	Must contain the short name of the member who reported the account. If a Member Short Name changed and its new Member Short Name is being reported for the first time, complete this field with the new Member Short Name. Provide the Old Member Short Name in the Old Member Short Name field (Field Tag 17).		Reject Field.						
03	Current/New Account Number	Required	P	V	25	Must contain the account number assigned by the member to the borrower. If an account number changed and the new number is being reported for the first time, complete this field with the new account number. If an account number changed and the new number is being reported for the first time, complete this field with the new account number. Provide the old account number in the Old Account Number field (Field Tag 18). In case the account numbers are not unique across all branches/offices, then prefix the number with the internally assigned branch/office code. For account type credit card or similar credit types, CIs shall submit account number which is different from credit card number	Minimum length required as configured by CIC on a per account type or system- wide default setting. <table><tr><td>Acct. Type</td><td>Min. Len</td></tr><tr><td>02</td><td>04</td></tr><tr><td>05</td><td>04</td></tr></table>	Acct. Type	Min. Len	02	04	05	04	Reject Record.
Acct. Type	Min. Len													
02	04													
05	04													

04	Account Type	Required	N	F	02	Please refer to the Account Type values in Appendix D. If an account type changed and the new type is being reported for the first time, complete this field with the new account type. Provide the old account type in the Old Account Type field (Field Tag 19).		Reject Record.
05	Ownership Indicator	Required	N	F	01	Valid values are: 1 = Individual 2 = Authorised User (refers to supplementary credit card holder) 3 = Guarantor 4 = Joint 5 = Deceased If the value reported in this field is 2, (specifically Authorised User) then the Account Type field (Field Tag 04) must contain the value 10 (Credit Card). If an ownership indicator changed and the new indicator is being reported for the first time, complete this field with the new ownership indicator. Provide the old ownership indicator in the Old Ownership Indicator field (Field Tag 20).		Reject Record.
08	Date Opened/Disbursed	Required	N	F	08	This is the date of first disbursement by the member. For Credit/Fleet cards, this is the date the card becomes active. The following rule applies for this field: Must be on or earlier than the date in the Date Reported and		Reject Record.

						Certified field in the Header Segment (TUDF/CONS). Must be on or earlier than the date in the Date of Last Payment field (Field Tag 09) of the Account Segment (TL). Must be on or earlier than the date in the Date Closed field (Field Tag 10) of the Account Segment (TL). Must be on or earlier than the date in the Date Reported and Certified field (Field Tag 11) of the Account Segment (TL).		
09	Date of Last Payment	Optional	N	F	08	This is the most recent date a payment was made on the account. The following rule applies for this field: Must be on or earlier than the date in the Date Reported and Certified field in the Header Segment (TUDF/CONS). Must be on or later than the date in the Date Opened/Disbursed field (Field Tag 08) of the Account Segment (TL). Must be on or earlier than the date in the Date Closed field (Field Tag 10) of the Account Segment (TL) for cases where Credit Facility Status field (Field Tag 22) is not provided (Only for active loans / accounts / trades). This date could be on or later than the date closed if any credit facility is provided from Credit Facility Status field (Field Tag 22)		Reject Field.

						including 99- clear existing status. Must be on or earlier than the date in the Date Reported and Certified field (Field Tag 11) of the Account Segment (TL).		
10	Date Closed	Optional	N	F	08	This is the date the member or borrower closed the account / Credit Limit (As applicable). Current balance field should be zero (0) or negative if value in the Date closed field is provided. The following rule applies for this field: Must be on or earlier than the date in the Date Reported and Certified field in the Header Segment (TUDF/CONS). Must be on or later than the date in the Date Opened/Disbursed field (Field Tag 08) of the Account Segment (TL). Must be on or later than the date in the Date of Last Payment field (Field Tag 09) of the Account Segment (TL) for cases where Credit Facility Status field (Field Tag 22) is not provided (Only for active loans / accounts / trades). Must be on or earlier than the date in the Date Reported and Certified field (Field Tag 11) of the Account Segment (TL).	If Date Closed is provided & current balance is positive	Reject Record
11	Date Reported and Certified	See Comments	N	F	08	This is the date as of which the data is reported and certified to CIC. This is not the date the data input file was created or the date of extraction.	If this field is not supplied.	Defaults to the Date Reported and Certified in the Header Segment.

						For example, ABC Bank reports data as of 31 March 2004, extracts the file on 5 April 2004 and submits the file to CICs on 12 April 2004. In this case, the Date Reported and Certified will be 31032004. The default date for this field is the date in the Date Reported and Certified field in the Header Segment (UCRF). The latest possible date reported is yesterday's date. This date can also be the default value for the Date Reported and Certified field in the Header segment(s). The following rule applies for this field: Must be on or earlier than it should match with the date in the Date Reported and Certified field in the Header Segment (TUDF/CONS). Must be on or later than the date in the Date Opened/Disbursed field (Field Tag 08) of the Account Segment (TL). Must be on or later than the date in the Date of Last Payment field (Field Tag 09) of the Account Segment (TL)	Dates in this field can be a maximum of one year old, and the latest possible Date Reported and Certified is yesterday's date.	Reject Record.
12	High Credit/Sanctioned Amount	Required	N	V	20	For Credit Card (Account Type 10), Fleet Card (Account Type 16), Secured Credit Card (Account Type 31) and Corporate Credit Card (Account Type 35), this field contains the highest		Reject Record.

						amount of credit used in the history of the account. For all other accounts, this field contains the amount of loan sanctioned. This amount is a whole number and should be zero or positive. Amount is in Indian Rupees.		
13	Current Balance	Required	N	V	20	The entire amount of credit/loan, including the current and overdue portion, if any, outstanding as of the date in the Date Reported and Certified field. This is inclusive of interest for all types of Credit Cards (Account Type = 10,16,31,35), but for the other Account Types, this is exclusive of interest. The maximum length for this field is 20 bytes, where the first 19 bytes represent numbers and the last byte has been reserved for a positive (+) or a negative (-) sign. This amount must be a whole number and can be either positive (+) specifically with debit balance or negative (-) specifically with credit balance. If the balance is zero, report as 0. If a sign appears in this field, it must appear at the end of the field. If no sign appears, it is assumed to be positive. This field must contain the value zero in case of all closed accounts where balance is zero. Amount is in Indian Rupees.		Reject Record.
14	Amount Overdue	Optional	N	V	20	The amount past due as of the date in the Date Reported and	If Account Type is not 10 (Credit	Reject Record (System will

						Certified field. This amount must be a whole number and is assumed to be positive. Amount is in Indian Rupees. If Account Type (Field Tag 04) is not 10 (Credit card), 16,31,35 and Number of Days Past Due (Field Tag 15) is reported greater than zero, then Amount Overdue must be greater than zero. Amount Overdue should include Principle, Interest and any other charges levied upon borrower by the Bank	Card), 16,31,35 and Amount Overdue > 0 and Number of Days Past Due is 000.	treat the error as if it is not reported).
15	Number of Days Past Due	See Comments	N	V	03	Must contain the number of days past due as of the date in the Date Reported and Certified field. For example, 68 Days Past Due. If the account is current, report as 0. Maximum value is 900. If actual value > 900, report 900. If Account Type (Field Tag 04) is not 10 (Credit Card), 16,31,35 and Amount Overdue (Field Tag 14) is greater than zero, then Number of Days Past Due must be greater than zero. Either this field or the Asset Classification (Field Tag 26) must be reported.	Neither this field nor the Asset Classification (Tag 26) is provided. If Account Type is not 10 (Credit Card), 16,31,35 and Number of Days Past Due > 000 and Amount Overdue is 0. Number of Days Past Due > 900.	Reject Record. Reject Record. (System will treat the error as if it is not reported.) Set Number of Days Past Due to 900.
16	Old Reporting Member Code	Optional See Comments	A/N	F	10	If a Reporting Member Code changed and their new Reporting Member Code is reported for the first time in the Current/New Reporting Member Code field (Field Tag 01), the Old Reporting Member Code must be reported in this field.		Reject Record

						If either this field or the Old Reporting Member Short Name is invalid, the record is rejected.		
17	Old Member Short Name	Optional See Comments	A/N*	V	16	If a Member Short Name changed and its new Short Name is reported for the first time in the Current/New Member Short Name field (Field Tag 02), the Old Member Short Name must be reported in this field. If this field is reported, the Old Reporting Member Code is Required. If either this field or the Old Reporting Member Code is invalid, the record is rejected.		Reject Record.
18	Old Account Number	Optional See comments	P	V	25	If an account number changed and the new account number is reported for the first time in the Current/New Account Number field (Field Tag 03), the old account number must be reported in this field. If Old Account Number is provided, Old Reporting Member Code should be reported.		Reject Record.
19	Old Account Type	Optional See comments	N	F	02	Please refer to the Account Type values in Appendix D. If an account type changed and the new account type is reported for the first time in the Account Type field (Field Tag 04), the old account type must be reported in this field.		Reject Field.
20	Old Ownership Indicator	Optional See comments	N	F	01	If an ownership indicator changed and the new ownership indicator is reported for the first time in the Ownership Indicator field (Field Tag 05), the old ownership		Reject Field.

						indicator must be reported in this field. Refer to Ownership Indicator field (Field Tag 05) for a list of valid values.		
21	Suit Filed / Wilful Default	Optional	N	F	02	If an account has been classified in any of the categories mentioned below, then status must be provided. Valid status are: 00 = No Suit filed 01 = Suit filed 02 = Wilful default 03 = Suit filed (Wilful default) If this field is not reported, then status will be considered as blank and updated accordingly for that particular date reported.		Reject Field.
22	Credit Facility Status	When Applicable	N	F	02	If an account has been classified in any of the categories mentioned below, then status must be provided. Refer Appendix-F for Detailed Description of all Credit Facility Status Valid status are: 00 = Restructured Loan 01 = Restructured Loan (Govt. Mandated) 02 = Written-off 03 = Settled 04 = Post (WO) Settled 05 = Account Sold 06 = Written Off and Account Sold 07 = Account Purchased 08 = Account Purchased and Written Off 09 = Account Purchased and Settled 10 = Account Purchased and Restructured 11 = Restructured due to Natural	If the status is invalid. If status is 02 , 03 , 04 , and the written-off amount fields in Tag 41 and 42 are not provided. If status is 17 and catalogue value in Tag 05 is not 3	Reject Field. Configurable to Reject Record. Configurable to Reject Record.

						Calamity 12 = Restructured due to COVID-19 13 = Post Write Off Closed 14 = Restructured & Closed 15 = Auctioned & Settled 16 = Repossessed & Settled 17 = Guarantee Invoked 99 = Clear existing status If this field is not reported, then the previous reported value will continue to be displayed in the CIR		
26	Asset Classification	See Comments	N	F	02	Either this field or the Number of Days Past Due field (Field Tag 15) must be entered. Valid values are: 01 = Standard 02 = Substandard 03 = Doubtful 04 = Loss 05 = Special Mention Account	Neither this field nor the Number of Days Past Due (Tag 15) is provided. If both Asset Classification and Number of Days Past Due are provided, then Number of Days Past Due will take precedence.	Reject Record. Reject Field.
34	Value of Collateral	Optional	N	V	20	Value is in Indian Rupees. This amount must be a whole number and it has to be positive.	If Type of Collateral field (Field Tag 34) is not present or reported as 00.	Reject Field.
35	Type of Collateral	Optional	N	F	02	Valid values are: 00 = No Collateral 01 = Property 02 = Gold 03 = Shares 04 = Saving Account and Fixed Deposit 05 = Multiple Securities 06 = Others		Reject Field.

36	Credit Limit	Optional	N	V	20	To be reported only when Account Type (Field Tag 04) reported is 10,16,31 & 35. Must not be reported for other account types. This amount must be a whole number and is assumed to be positive or zero. Amount is in Indian Rupees.	If provided and Account Type is not 10,16,31 & 35 .	Reject Field.
37	Cash Limit	Optional	N	V	20	To be reported only when Account Type (Field Tag 04) reported is 10,16,31 & 35. Must not be reported for other account types. This amount must be a whole number and is assumed to be positive or zero. Amount is in Indian Rupees.	If provided and Account Type is not 10,16,31 & 35.	Reject Field.
38	Rate Of Interest	Optional	D	V	08	Report numeric value without the percentage sign. One or more digits followed by the decimal point, followed by one or more digits. Maximum number of digits before the decimal point is 4. Maximum number of digits after the decimal point is 3. If there are more than 3 digits after the decimal point, the system will retain the first 3 digits and ignores the rest.	If there are more than 4 digits before the decimal point or a value of 0.0.	Reject Field.
39	Repayment Tenure	Optional	N	V	03	Should be the count of number of months for repayment.	If the value is 0.	Reject Field.
40	EMI Amount	Optional	N	V	20	To be reported except when Account Types (Field Tag 04) is 10,16,31,35 and 12. This amount must be a whole	If provided and Account Type is 10,16,31,35 and 12 .	Reject Field.

						number and is assumed to be positive.	If the value is 0.	Reject Field.
						Amount is in Indian Rupees.		
41	Written-off Amount (Total)	See Comments	N	V	20	To be reported when Credit Facility Status field is reported as 02, 03, 04 . This amount must be a whole number and is assumed to be positive. Amount is in Indian Rupees.	If provided and Credit Facility Status is not 02, 03, 04 . If the value is 0 and Written-off Amount (Principal) field is also zero. If both Written-off Amounts (Total) and (Principal) are not provided when Credit Facility Status field is reported as 02, 03, 04.	Reject Field. Reject Field. Configurable to Reject Record.
42	Written-off Amount (Principal)	See Comments	N	V	20	To be reported when Credit Facility Status field is reported as 02, 03, 04 . This amount must be a whole number and is assumed to be positive. Amount is in Indian Rupees.	If provided and Credit Facility Status is not 02, 03, 04 . If the value is 0 and Written-off Amount (Total) field is also zero. If the value is greater than the Written-off Amount (Total). If both Written-off Amounts (Total) and (Principal) are not provided	Reject Field. Reject Field. Reject Field. Configurable to Reject Record.

							when Credit Facility Status field is reported as 02, 03, 04.	
43	Settlement Amount	See Comments	N	V	20	To be reported when Credit Facility Status field is reported as 03, 04, 15 or 16 . This amount must be a whole number and is assumed to be positive. Amount is in Indian Rupees.	If provided and Credit Facility Status is not 03, 04, 15 or 16 If the value is 0.	Reject Field. Reject Field.
44	Payment Frequency	Optional	N	F	02	Valid values are: 01 = Weekly 02 = Fortnightly 03 = Monthly 04 = Quarterly 05 = Bullet payment 06 = Daily 07 = Half yearly 08 = Yearly 09 = On-demand		Reject Field.
45	Actual Payment Amount	Optional	N	V	20	This amount must be a whole number and is assumed to be positive. Amount is in Indian Rupees.	If the value is 0.	Reject Field.
46	Occupation Code	Optional	N	F	02	Valid codes are: 01 = Salaried 02 = Self Employed Professional 03 = Self Employed 04 = Others		Reject Field.
47	Income	Optional	N	V	20	Income Amount. This amount must be a whole number and is assumed to be positive.	If income is 0.	Reject Field.
48	Net/Gross Income Indicator	Optional	A	F	01	Indicates whether the amount specified in the Income field is Gross or Net. Valid indicators are: G = Gross Income N = Net Income	If income is not present or invalid.	Reject Field.

49	Monthly/Annual Income Indicator	Optional	A	F	01	Indicates whether the amount specified in the Income field is Annual or Monthly. Valid indicators are: M = Monthly A = Annual	If income is not present or invalid.	Reject Field.
Sum of all maximum byte lengths:					412			
Sum of all two-byte tags and two-byte lengths:					152			
Maximum byte size of segment:					564			

Account History Segment (TH)

Historical account data may be received via UCRF submission for initial loading only. The Account History segment may occur multiple times in a UCRF submission per record, but only once for any year/month of the Account History Date. The system will overwrite any existing historical account data as provided in this segment for the corresponding year/month. Only up to the last 48 months from the year/month of the Date Reported and Certified field (Field Tag 11) in the Account Segment (TL) is allowed. The following business rules apply to this segment:

- It is a Optional segment.
- It is variable in length and can be of a maximum size of 117 bytes.
- This can occur maximum of 47 times per record.
- The Account History Date should be unique within the same record.

Field Tag	Field Name	Field Type	Character Type	Length Type	Maximum Length	Comments	Applicable Rule	Failure Outcome
TH	Segment Tag	Required	A/N	F	03	Contains H01 initially. If multiple TH segments are to be provided, the first segment contains H01 , the second contains H02 and so on up to H47 .		
01	Account History Date	Required	N	F	08	This is the date as of which the historical account data would have reported to CIC. The day in this field will always be reset to 01. For example, ABC Bank reports historical payment data as of March 2008, the Account History Date will be 01032008. The latest possible date reported is previous month of the date in Date Reported and Certified (Field Tag 11) field in the TL Segment. The following rule applies for this field:	If the historical account data already exists for the date reported in this field.	Reject Segment.

						Must be on or earlier than the month and year in the Date Reported and Certified field in the Header Segment (TUDF/CONS). Must be on or earlier than the month and year in the Date Reported and Certified field (Field Tag 11) of the Account Segment (TL). Must not be more than 48 months earlier than the month and year in the Date Reported and Certified field (Field Tag 11) of the Account Segment (TL).		
02	Asset Classification / NDPD	Required	P	F	03	Must contain the Number of Days Past Due (NDPD) or asset classification as of the year/month in the Account History Date field. Valid values are: STD = Standard SUB = Substandard DBT = Doubtful LSS = Loss SMA = Special Mention Account ### = Number of days past due where ### is a 3-digit number. Refer to Number of Days Past Due (Field Tag 15) field in the TL Segment for details.		Reject Segment.
03	Amount Overdue	Optional	N	V	20	The amount past due as of the year/month in the Account History Date field. This amount must be a whole number and is assumed to be positive. Amount is in Indian Rupees. Refer to Amount Overdue (Field Tag 14) field in the TL Segment for details.		Reject Segment.

04	High Credit/Sanctioned Amount	Optional	N	V	20	For Credit Card (Account Type 10) and Fleet Card (Account Type 16), this field contains the highest amount of credit used in the history of the account. For all other accounts, this field contains the amount of loan sanctioned as of the year/month in the Account History Date field. This amount is a whole number and should be zero or positive. Amount is in Indian Rupees.		Reject Record.
05	Credit Limit	Optional	N	V	20	This field is applicable only when Account Type (Field Tag 04) in the TL segment is reported as 10. Must not be reported for other account types. This amount must be a whole number and is assumed to be positive or zero as of the year/month in the Account History Date field. Amount is in Indian Rupees.	If provided and in the TL segment is not reported as 10 .	Reject Field.
06	Cash Limit	Optional	N	V	20	This field is applicable only when Account Type (Field Tag 04) in the TL segment is reported as 10. Must not be reported for other account types. This amount must be a whole number and is assumed to be positive or Zero as of the year/month in the Account History Date field. Amount is in Indian Rupees.	If provided and in the TL segment is not reported as 10 .	Reject Field.
07	Current Balance	Required	N	V	20	The entire amount of credit/loan, including the current and overdue portion, if any, outstanding as of the year/month in the Account History		Reject Segment.

						Date field. This is inclusive of interest for Credit Cards (Account Type = 10), but for the other Account Types, this is exclusive of interest. The maximum length for this field is 10 bytes, where the first 9 bytes represent numbers and the last byte has been reserved for a positive (+) or a negative (-) sign. This amount must be a whole number and can be either positive (+) specifically with debit balance or negative (-) specifically with credit balance. If the balance is zero, report as 0. If a sign appears in this field, it must appear at the end of the field. If no sign appears, it is assumed to be positive. This field must contain the value zero in case of all closed accounts where balance is zero. Amount is in Indian Rupees.		
08	Date of Last Payment	Optional	N	F	08	This is the most recent date a payment was made on the account. The following rule applies for this field: Must be on or earlier than the date in the Date Reported and Certified field in the Header Segment (TUDF/CONS). Must be on or earlier than the date in the Account History Date field (Field Tag 01) of the Account History Segment (TH)		Reject Field.
09	Actual Payment Amount	Optional	N	V	20	This amount must be a whole number and is assumed to be positive.	If the value is 0.	Reject Field.

						Amount is in Indian Rupees.		
Sum of all maximum byte lengths:					142			
Sum of all two-byte tags and two-byte lengths:					40			
Maximum byte size of segment:					182			

End of Subject Segment (ES)

The ES Segment denotes the end of the consumer record and:

- It is a Required segment.
- It is of a fixed size of 6 bytes.
- It occurs only once per record.

Position	Field Name	Character Type	Fixed Length	Comments
1	End Segment	A/N	06	Must contain the following: ES02**, where: ES = Segment Tag ** = End Characters
Total bytes:			06	

Trailer Segment (TRLR)

The TRLR Segment:

- It is a Required segment.
- It is of a fixed size of 4 bytes.
- It occurs only once per update file.
- Even if data is reported after TRLR (in between the record) then also the full file to be rejected

Position	Field Name	Character Type	Fixed Length	Comments
1	Trailer Segment	A	04	Must contain the value TRLR.
Total bytes:			04	

Appendix A – Allowed and Disallowed Characters

Following are the allowed and disallowed special characters in the Consumer Name Field1 to Field5:

Allowed	Disallowed
.	~
`	!
'	#
;	\$
:	%
"	^
-	&
_	*
(	=
)	
[	?
]	+
{	,
}	@
<	/
>	\
/	
\	

Note

The front slash (/) and the back slash (\) are allowed only when used with SON OF, WIFE OF, HUSBAND OF and DAUGHTER OF in any of the following ways: S/O, S\O, W/O, W\O, H\O, H/O, D/O, and D\O. In all other situations, their appearance will lead to a rejection of the record.

Appendix B – State / Union Territory Codes

Following is the list of State/Union Territory Codes as defined by Indian Census 2001:

Code	State / Union Territory	Code	State / Union Territory	Code	State / Union Territory
01	Jammu & Kashmir	02	Himachal Pradesh	03	Punjab
04	Chandigarh	05	Uttarakhand	06	Haryana
07	Delhi	08	Rajasthan	09	Uttar Pradesh
10	Bihar	11	Sikkim	12	Arunachal Pradesh
13	Nagaland	14	Manipur	15	Mizoram
16	Tripura	17	Meghalaya	18	Assam
19	West Bengal	20	Jharkhand	21	Orissa
22	Chhattisgarh	23	Madhya Pradesh	24	Gujarat
25	Dadra & Nagar Haveli and Daman & Diu			27	Maharashtra
28	Andhra Pradesh	29	Karnataka	30	Goa
31	Lakshadweep	32	Kerala	33	Tamil Nadu
34	Pondicherry	35	Andaman & Nicobar Islands	36	Telangana
		37	Ladakh	99	APO Address
		77	Foreign Address		

Appendix C – PIN Code Validation Table

This table represents the minimum and maximum digits allowed in the first two digits of the six-digit PIN Code:

State Code	State	First Two-digit PIN prefix (Min)	First Two-digit PIN prefix (Max)
01	Jammu & Kashmir	18	19
02	Himachal Pradesh	17	17
03	Punjab	14	16
04	Chandigarh	14	16
05	Uttarakhand	24	26
06	Haryana	12	13
07	Delhi	11	11
08	Rajasthan	30	34
09	Uttar Pradesh	20	28
10	Bihar	80	85
11	Sikkim	73	73
12	Arunachal Pradesh	78	79
13	Nagaland	79	79
14	Manipur	79	79
15	Mizoram	79	79
16	Tripura	72	79
17	Meghalaya	79	79
18	Assam	78	79
19	West Bengal	70	74
20	Jharkhand	81	83
21	Orissa	75	77
22	Chhattisgarh	46	49
23	Madhya Pradesh	45	48
24	Gujarat	36	39
25	Dadra & Nagar Haveli and Daman & Diu	36	39
27	Maharashtra	40	44
28	Andhra Pradesh	50	56
29	Karnataka	53	59
30	Goa	40	40
31	Lakshadweep	67	68
32	Kerala	67	69
33	Tamil Nadu	53	67
34	Pondicherry	53	67

35	Andaman & Nicobar Islands	74	74
36	Telangana	50	56
37	Ladakh	18	19
77	Foreign Address		
99	APO Address	90	99

Appendix D – Account Type Table

The account types and their corresponding codes are listed in the following table:

Value	Use	Account Type
01	Current	Auto Loan (Personal)
02	Current	Housing Loan
03	Current	Property Loan
04	Current	Loan Against Shares / Securities
05	Current	Personal Loan
06	Current	Consumer Loan
07	Current	Gold Loan
08	Current	Education Loan
09	Current	Loan to Professional
10	Current	Credit Card
11	Current	Leasing
12	Current	Overdraft
13	Current	Two-Wheeler Loan
14	Current	Non-Funded Credit Facility
15	Current	Loan Against Bank Deposits
16	Current	Fleet Card
17	Current	Commercial Vehicle Loan
18	Future	Telco – Wireless
19	Future	Telco – Broadband
20	Future	Telco – Landline
21	Current	Seller Financing
23	Current	GECL Loan Secured
24	Current	GECL Loan Unsecured

Value	Use	Account Type
25	Current	Working Capital Loan
26	Current	Commercial Equipment Loan
27	Current	Agriculture Loan
28	Current	Overdraft against FD
29	Current	Overdraft against Shares / Securities
30	Current	Overdraft against Collateral
31	Current	Secured Credit Card
32	Current	Used Car Loan
33	Current	Construction Equipment Loan
34	Current	Tractor Loan
35	Current	Corporate Credit Card
36	Current	Kisan Credit Card
37	Current	Loan on Credit Card
38	Current	Prime Minister Jaan Dhan Yojana – Overdraft
39	Current	Mudra Loans – Shishu / Kishor / Tarun
40	Current	Microfinance – Business Loan
41	Current	Microfinance – Personal Loan
42	Current	Microfinance – Housing Loan
43	Current	Microfinance – Others
44	Current	Pradhan Mantri Awas Yojana - Credit Link Subsidy Scheme MAY CLSS
45	Current	P2P Personal Loan
46	Current	P2P Auto Loan
47	Current	P2P Education Loan
50	Current	Business Loan – Secured
51	Current	Business Loan – General
52	Current	Business Loan – Priority Sector – Small Business

53	Current	Business Loan – Priority Sector – Agriculture
54	Current	Business Loan – Priority Sector – Others
55	Current	Business Non-Funded Credit Facility – General
56	Current	Business Non-Funded Credit Facility-Priority Sector- Small Business
57	Current	Business Non-Funded Credit Facility-Priority Sector-Agriculture
58	Current	Business Non-Funded Credit Facility-Priority Sector-Others
59	Current	Business Loan Against Bank Deposits
61	Current	Business Loan – Unsecured
69	Current	Short Term Personal Loan
70	Current	Priority Sector- Gold Loan
71	Current	Temporary Overdraft
00	Current	Other

Appendix E – Email Quality

Recommended checks on email quality:

1. 10 email ID is allowed which must have only one @ symbol and at least one dot (.)
 2. Before the @ symbol there must be at least 2 Alphanumeric characters present excluding special characters.
 3. After @symbol the domain name begins and must have at least 2 alphanumeric characters.
 4. Between the @ symbol and immediate next (.) Dot there must be 2 characters length
 5. After the last (.) there must be at least 2 alphabets Example abc@gmail.com.
 6. Example Kumar@gmail.com / kumar@yahoo.co.in
 7. The Email address cannot end with @ symbol or (.) symbol.
 8. There cannot be more than two consecutive (.) symbol after @ symbol
 9. Space is not allowed in email field. If Space is found in middle of email address, it would be rejected
 10. Before the @ symbol Special characters such as dots (.), hyphens (-), and underscores (_) are allowed along with characters [aA-zZ] & [0-9].
 11. Email addresses are not case-sensitive
-

Appendix F – Credit Facility Table

The credit facility status and their descriptions are listed in the following table:

Sr No	Credit Facility Status	Explanation
1	00 = Restructured Loan	Basis on borrower's request to lender modifies the terms of an existing loan to make it more manageable for the borrower. This approach aims to assist borrowers in avoiding default by offering temporary relief and enabling them to manage their debt more effectively.
2	01 = Restructured Loan (Govt. Mandated)	Restructured Loan (Government Mandated)" refers to a loan whose terms have been modified as part of a government-led initiative aimed at providing relief to borrowers experiencing financial challenges. This restructuring process involves cooperation between the borrower and lender.
3	02 = Written-off	A "written off" status indicates that the borrower has not repaid their outstanding loan or credit card debt for an extended period, based on respective policy by CI.
4	03 = Settled	The "Settled" status indicates that a portion of a loan or credit card debt has been paid, and the lender has agreed to accept a reduced payoff amount instead of the full original debt.
5	04 = Post (WO) Settled	Post (WO) Settled" on a consumer credit report indicates that a debt, previously written off (WO) by the lender due to non-payment, has been resolved. This signifies that the borrower and lender have reached an agreement to settle the debt for a reduced amount..
6	05 = Account Sold	In a consumer credit report, the term "Account Sold" indicates that the original lender has transferred or sold the debt to a third-party . As a result, the account is now expected to be reported by the buyer rather than the original lender.
7	06 = Written Off and Account Sold	"Written Off and Account Sold" refers to a situation in which a loan or credit account has been recognized by the lender as uncollectible. Consequently, the lender has classified the debt as a loss and may have transferred the account to a third party or Asset Reconstruction Company (ARC) for further management.

8	07 = Account Purchased	"Account Purchased" generally indicates that a debt has been bought from another lender, signifying that the original lender no longer owns the debt and that a new buyer possesses the rights to collect it.
9	08 = Account Purchased and Written Off	The term "Account Purchased and Written Off" refers to a situation in which a lender has classified an account as uncollectible and recorded it as a loss (written off). Subsequently, the debt associated with this account is sold to another party, which may include a debt collection agency or another financial institution.
10	09 = Account Purchased and Settled	An 'Account Purchased and Settled' refers to a situation where a lender has ceased efforts to collect an outstanding debt and has sold the account to a third-party entity. The third-party lender has agreed to accept a reduced payment, known as a settlement, to resolve the account. This transaction may have a detrimental effect on the borrower's credit score.
11	10 = Account Purchased and Restructured	The term "Account Purchased and Restructured" refers to a borrower loan or credit account that has been acquired by a different entity (referred to as a "purchased" account) and for which the terms of the loan have been adjusted (restructured) to better align with the borrower's financial circumstances.
12	11 = Restructured due to Natural Calamity	The term "Restructured due to Natural Calamity" indicates that the lender has renegotiated the terms of a loan to facilitate repayment, usually in response to financial difficulties resulting from a natural disaster.
13	12 = Restructured due to COVID-19	The phrase "Restructured due to COVID-19" indicates that a loan has been modified by the lender to alleviate the repayment challenges resulting from financial difficulties caused by the COVID-19 pandemic.
14	13= Post Write Off Closed	Post Write-Off Closed" refers to the status of a loan that has previously been written off, indicating that the lender has received full payment of the outstanding amount. Subsequently, the lender can choose to report either 'Post Write Off Closed' or '99-Clear Existing Status.
15	14=Restructured & Closed	In the Borrower's credit report, the term "Restructured" denotes that the lender has altered the original loan terms in response to financial difficulties faced by the borrower(due to any reason) or by Government Scheme. Conversely, "Closed" indicates that the restructured loan account has been fully repaid and officially closed by the lender.

16	15=Auctioned & Settled	In the context of a credit report, the term "auctioned" refers to a scenario in which a lender reclaims and sells a collateralized asset, such as a house or car, in order to recover funds from a defaulted loan. Conversely, "settled" indicates that the borrower and lender have reached an agreement to pay a portion of the loan, rather than the full amount, to close the account.
17	16=Repossessed & Settled	In a credit report, the term "repossessed" signifies that a lender has taken ownership of an asset, such as a vehicle or property, due to the borrower's default on a loan. Conversely, "settled" refers to a situation where a borrower has paid less than the total amount owed to fully close the account.
18	17=Guarantee Invoked	In the context of a credit report, the term "Guarantee Invoked" refers to a situation in which a guarantee or surety has been activated due to the failure of the obligated party to fulfill their commitment, such as repaying a loan. As a result, the guarantor is now responsible for satisfying the debt.
19	99 = Clear existing status	In the context of a credit report, the designation "99" typically indicates a "Clear Existing Status" or "No Dues," signifying that the loan or credit account has been fully paid, with no outstanding issues. This suggests that the lender has reported the account as closed.
